

Jumeirah Khor Dubai Hotel & Apartments

Dubai, UAE

Client: Dubai Healthcare City

Situated near the Dubai Creek, these 166.5m high towers were designed to provide amazing views of Dubai Creek and Sheikh Zayed Road skyline. The 200,000 m2 development will contain world-class retail, offices, hotel, and serviced apartment units. Each tower accommodates three dedicated service floors to satisfy all functional requirements.

Scope: Structural Engineering
Mechanical Engineering
Electrical Engineering

The project consists of mixed-use twin towers and is made up of three levels of podium, 43 floors of apartments, 34 floors of hotel tower and four levels of parking below grade. The ground floor comprises hotel facilities, meeting rooms, function spaces, auditorium, hotel and apartment lobbies and service areas.

Designed with health tourism in mind, the hotel tower is comprised of special medical rooms, suites and guest rooms.
