

University Of California Davis Medical Center Sacramento, California

Client: University of California
Davis Medical Center
Sacramento, California

Scope: 464,000 sq. ft., Tower II

U.C. Davis Tower II is a thirteen-story medical facility with two interstitial floors accommodating mechanical equipment. The structure includes a 9-story 220,000 sq. ft. nursing tower accommodating 105 beds, positioned over a 2-story, 60,000 sq. ft. base building. The building also accommodates a bone marrow transplant unit, isolation rooms, a radiology department and an expanded distribution and receiving area.

Indoor air quality is maintained by a 100% outside air HVAC system with heat recovery.

This new tower delivers the highest quality state-of-the-art health care and is a world class medical facility.
